

MVP Health Care Preventive Drug List March 2011

Preventive Drugs are medications that MVP Health Care, in conjunction with its Pharmacy & Therapeutics (P&T) Committee, has determined may prevent the onset of a disease or condition when taken by a person who has developed risk factors for a disease or condition that has not yet manifested itself or has not become clinically apparent (asymptomatic), or may prevent the recurrence of a disease or condition from which a person has recovered.

High Deductible Health Plans (HDHPs) may provide benefits only after a deductible has been met. However, Federal regulations do allow safe harbor coverage for qualifying preventative services, and medications (those listed below) prior to the deductible being met. The preventive safe harbor does not include any drug or medication used to treat an existing illness, injury or condition.

Medications on the Preventive Drug List are subject to Formulary and Tier status as well as pharmacy management programs such as prior authorization, step therapy and/or quantity limits. Refer to the Prescription Drug Formulary online at www.mvphealthcare.com for more detailed information about coverage and Tier information.

This list is not a guarantee of coverage. Your Certificate of Coverage determines your benefits, limitations and exclusions. While every effort has been made to ensure accuracy, some information may be out of date. The Preventive Drug List is subject to change based on decisions made by the P&T committee.

If you need more information about the content of this list, contact the Member Services Department at the phone number listed on your identification card.

ACE INHIBITORS

ACCUPRIL
ACEON
ALTACE
BENZAEPRI
CAPOTEN
CAPTOPRIL
ENALAPRIL
FOSINOPRIL
LISINOPRIL
LOTENSIN
